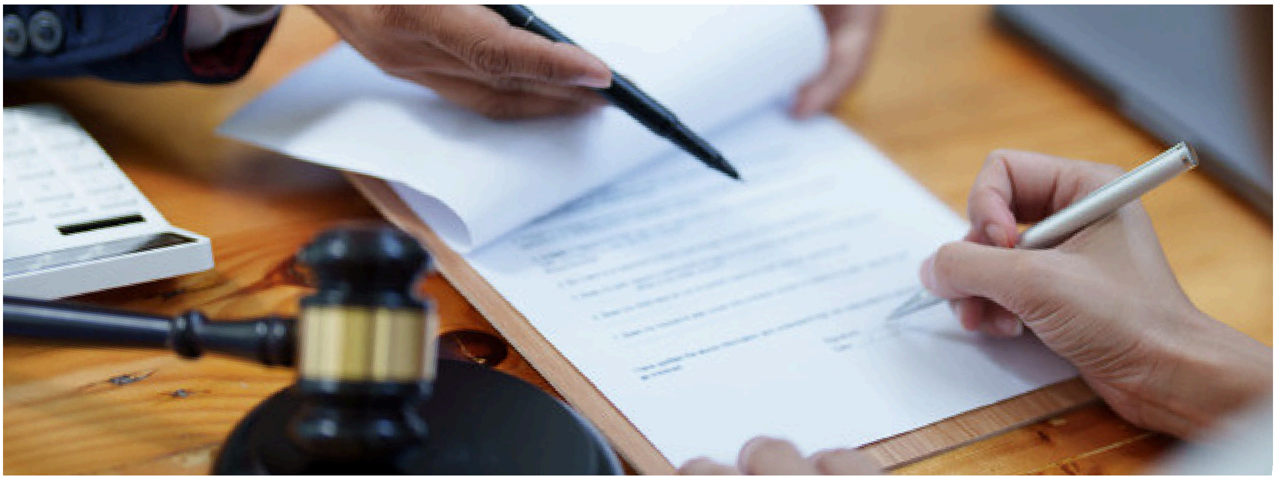
ADVERSE MEDIA: 91/100 ✓
LOW RISK · No press issues

COMPOSITE: 82/100 LOW RISK
APPROVED | REF: OS-2026-0001

DIMENSION 1: BUSINESS LEGITIMACY — 88/100

Assessing the validity and strength of Korteks Mensucat's operations



Korteks Mensucat has established a solid reputation since its founding in 1989. As a subsidiary of the prestigious Zorlu Group, the company employs approximately 2,200 individuals and generates around USD 400 million in revenue. Their active participation in the Turkish trade registry further solidifies their standing as a **legitimate and reliable** business entity.

The absence of insolvency or litigation records demonstrates Korteks Mensucat's financial stability and commitment to ethical practices. With a robust workforce and significant revenue, they are well-positioned in the **polyester yarn manufacturing** industry. The company’s longevity and adherence to local regulations contribute to their low-risk assessment in business legitimacy.

CERTIFICATIONS & STANDARDS — 85/100

Key certifications demonstrating Korteks' commitment to sustainability

Korteks Mensucat holds significant certifications that reflect its commitment to quality and sustainability. It is certified under ISO 50001 for Energy Management, indicating a structured approach to energy efficiency. Additionally, the Environmental Product Declaration (EPD) demonstrates transparency in environmental impact, ensuring that customers can make informed decisions regarding sustainability in their polyester yarn products.

As a signatory of the UN Global Compact, Korteks aligns its operations with internationally recognized principles regarding human rights, labor, and environmental protection. Moreover, the TAC REBORN certification highlights its dedication to producing recycled polyester yarn, contributing to reduced waste and promoting a circular economy. These certifications showcase Korteks' active role in sustainable manufacturing practices.

EU COMPLIANCE READINESS — 78/100

Evaluating Korteks' alignment with EU regulatory standards

Korteks Mensucat has demonstrated **solid progress** in EU compliance, confirmed by participation in 2 EU Horizon Europe research projects. The company also published a GRI-aligned Sustainability Report in 2021. However, a **Scope 3 gap** has been noted, which requires attention for full regulatory adherence in upcoming assessments.

The current compliance status indicates a **low risk** for Korteks. While the company excels in many areas, the partial compliance with the CSRD indicates that it must enhance its efforts regarding Scope 3 emissions. Addressing this gap is crucial for sustainable operations and future regulatory compliance.

SANCTIONS & WATCHLISTS — 98/100

Comprehensive review of Korteks' sanction status and compliance

Korteks Mensucat demonstrates a **strong compliance track record** regarding sanctions. The company has been thoroughly vetted against major watchlists, including the EU FSF, UN Consolidated List, and others, resulting in **no matches found**. This positions Korteks as a reliable partner in the polyester yarn manufacturing sector, minimizing exposure to sanction-related risks.

The absence of adverse findings across all major watchlists further emphasizes the company's commitment to **regulatory compliance**. With stringent adherence to local and international laws, Korteks remains vigilant in monitoring potential risks, ensuring that **business operations** are aligned with best practices for ethical sourcing and sustainability.

LABOUR RIGHTS — 65/100

Assessment Overview

Korteks Mensucat has maintained a record of **no direct violations** regarding labour practices. However, Turkey's moderate risk level, as assessed by **Freedom House** and the ILO, necessitates continued vigilance. It is crucial to monitor developments regarding labour rights within the country and ensure compliance with international standards.

While there are no reported issues of child or forced labour directly linked to Korteks, the broader **country-level risks** highlight the need for ongoing assessment. Regular reviews of labour conditions and potential violations within the Turkish context will help safeguard the company's reputation and operational integrity.

NEWS & ADVERSE MEDIA — 91/100

Comprehensive analysis of media coverage and reports

The examination of adverse media reveals that **Korteks Mensucat has maintained a strong** reputation in the industry. There is no record of negative coverage in prominent EU, UK, or US press outlets. The company's positive partnerships in academic initiatives further enhance its public image, showcasing a commitment to sustainability and innovation in the polyester yarn sector.

Additionally, there have been **no allegations** of greenwashing or controversies associated with Korteks. This solid performance in media visibility underscores the effectiveness of their communication strategies. Ongoing monitoring is recommended to ensure that the company's positive reputation is preserved in light of evolving market conditions and regulatory landscapes.

EU REGULATORY MATRIX — KORTEKS MENSUCAT

Understanding the regulatory landscape for suppliers in the EU

CSRD — PARTIAL

GRI 2021 published. Scope 3 data absent.

CSDDD — PASS

No labour violations. Tier 1 compliant.

DPP — PARTIAL

REACH — PASS

Polyester compliant, no restricted substances.

EUDR — N/A

Synthetic product. Not in scope.

SFDR — N/A

Not a financial market participant.

APPROVED FOR SOURCING

Comprehensive assessment of Korteks Mensucat's sourcing viability

After thorough evaluation, **Korteks Mensucat San. ve Tic. A.S.** has been assessed with a **LOW RISK** rating. The composite score of **82/100** reflects strong compliance with environmental, social, and governance standards. Recommendations include monitoring compliance with **Scope 3 data** for CSRD and annual checks on **DPP compliance**. Ongoing attention to labour developments in Turkey is also advised.

METHODOLOGY OVERVIEW

Comprehensive approach to supplier intelligence assessment

OptiSupply employs a **rigorous methodology** that relies solely on open-source intelligence. We do not accept self-reported data, ensuring an objective assessment. Our analysis evaluates six key dimensions, which allows for a comprehensive understanding of supplier risks. Reports are delivered within a quick 48-hour turnaround time at a fixed fee of €249.

Data sources include reputable international databases such as the EU FSF, UN Lists, and OFAC, alongside industry standards like ISO certifications. We also leverage information from news outlets, academic research, and regulatory bodies to ensure an accurate and transparent evaluation. This multifaceted approach provides a clear view of supplier compliance and risk factors.
